

Bob Rogers
Mayor

City of Murray

August 16th, 2022

Notice from Ron Allbritten, Street & Solid Waste Manager:

Typically, the City has two residential route trucks running each day to collect residential trash.

Yesterday (Monday, August 15th), the City was short one of its residential route trucks and driver. Part of Monday's route was collected by the second truck after completing its route, but not all of Monday's route was able to be completed.

Today, both trucks are running. One of the trucks is completing yesterday's route that was missed. Once Monday's route is completed, she will begin Tuesday's route. The other truck is completing its Tuesday route today, and once finished, will assist the other driver with her Tuesday route.

We hope to have this all caught up no later than Thursday. If you are not serviced on your normally scheduled service day this week, please leave your cart out for an additional day, as your service may be delayed by one day.

Thank you for your patience and understanding.
